CITIES MAY FIGHT COMMITTEE PLAN

Several, Disappointed in Not Being Named for Federal Bank, Expected to Organize in Struggle for Redistricting of Country—Designations Criticized in Congress.

Washington, April 3.-There was every indication here to-night that the announcement of the reserve districts part of several cities, which were dis-

to review, except by the Federal Re-serve Board. This board probably will not be named by President Wilson for veral weeks, but, in the meantime, is believed that those disappointed with the committee's announcement will bend every effort toward paving the way for changes.

It was pointed out to-night that both ecretary of the Treasury McAdoo and omptroller of the Currency Williams, of the organization committee, are ex officio members of the reserva hoard, and hardly could be counted upon to reverse themselves. The President has given no intimation as to who the other five members will be.

Senator Hitchcock pointed to the fact that Omaha had been included in the Kansas City district, instead of the not flow that way.

Richmond Ungatmons Choice. Defenders of the committee said to-night that there was no justification for the charge that it was influenced of trade and the banking ndvantages in cities chosen. In re-ferring to the choice of Richmond, it was said that, although comment was expected, because of the fact the city is the home of Mr. Williams, the committee was unanimous, and Richmond would have been named over Baltimore and Washington if he had not been a

no definite plans for any fight against the committee have been accounted here, and there is practically taken, except through the reserve rd. It was suggested to-night, sever, that members of Congress might undertake to provide banks for their districts by having the number of authorized reserve cities increased. the twelve regional reserve banks would open for business within three months, and that the revolutionary change in the nation's financial ma-chinery would be established within that time. With the designation of the reserve centres, the organization committee took the first decisive step toward perfection of the system.

Banks to Be Notified. The first work to-day was official certification to Comptroller of the Currency Williams of the selections, and Mr. Williams began notifying 7,548 national and State banks which have applied for membership. It was the general expectation that member banks the twelve districts would imme diately begin preparing for the establishment of their reserve banks. Every bank must begin payment of a sub-scription of 6 per cent of its capital and surplus to the stock of its reserve

NO WORD FROM STEAMER

Fears Felt for Safety of Southern
Cross and Crew of 170 Men.
St. Johns, April 2.—As the hours went
by to-night without word from the
sealing steamer Southern Cross, fear
grew that her crew of 170 men had
been added to the loss of life of Tuesday's blizzard, in which seventy-seven
men of the sealer Newfoundland lost
their lives. The number of the Newfoundland dead was definitely determined late to-day with the further possibility that several of the 112 who
were rescued would succumb to the
effects of the forty-eight hours' exposure. Arrangements were made towere rescued would succumb to the effects of the forty-eight hours' exposure. Arrangements were made tonight for the reception of the rescue ship Bellaventure, expected to arrive to-morrow, bringing most of the dead and many of the survivors.

In an effort to solve the mystery of the disappearance of the Southern Cross, the Newfoundland government to-day Jasked the American revenue cutter Seneca to search for the missing sealer. The coastal steamer Kyle, which has a wireless equipment, was fitted out here for a cruise along the southeastern coast, off which the Southern Cross was last seen Tuesday morning, a few hours before the three days' blizzard set in.

Although the vessels of the so-called wooden-walled sealing fleet, of which the Southern Cross was one, have "bucked" ice fields with impunity, and are regarded as stanch ships, sealers say her cargo of 17,000 seal pelts would be an active danger during a storm, on account of its instability.
